PORTABLE BAMBOO HOMES

STANDARD DESIGNS

"Designed by nature, carried on wheels."

**Bamboo House India
Hyderabad**

www.bamboohouseindia.org

"These Portable bamboo homes are suitable for installation only on land and not for terrace."

Introduction

Imagine homes that are not just built on the earth, but for the earth.

At Bamboo House India, we are pioneering a new chapter in eco-conscious living through portable engineered bamboo homes—lightweight, modular, and built with nature's most renewable resource.

Designed for flexibility, these homes come with pre-installed electricals, bathrooms, kitchens, waterproof walling, and cement board flooring—ready to use, easy to relocate, and perfect for land installations, remote villages, farm houses, yoga centers, cafeteria, hospitals, schools, tourism, disaster-relief zones, and smart city projects.

With over 40 house sizes to suit every budget and a growing demand for sustainable housing, our model presents a high-impact, low-carbon solution with vast market potential.

Join us in transforming the future of housing—portable, affordable, and inspired by nature.
