

A photograph of four children (two boys and two girls) running barefoot through a lush green field. They are positioned in front of a large, mature bamboo tree on the left. The sun is shining through the bamboo leaves, creating a warm, golden glow. The children are smiling and appear to be enjoying their time outdoors.

Bamboo House India

SUSTAINABLE HOMES

Bamboo & Recycled Plastic House Prices

Introduction

Imagine homes that are not just built on the earth, but for the earth.

At Bamboo House India, we are pioneering a new chapter in eco-conscious living through portable engineered bamboo and recycled plastic homes—lightweight, modular, and built using renewable resource.

Designed for flexibility, these homes come with pre-installed electricals, bathrooms, kitchens, waterproof walling, and cement board flooring—ready to use, easy to relocate, and perfect for land installations, remote villages, farm houses, yoga centers, cafeteria, hospitals, schools, tourism, disaster-relief zones, and smart city projects.

With sizes to suit every budget and a growing demand for sustainable housing, our model presents a high-impact, low-carbon solution with vast market potential.

Join us in transforming the future of housing—portable, affordable, and inspired by nature.
